The list above is designed to help you organize your cleaning efforts so that you can tackle any cleaning project.

This list does not need to be completed in one day, and once you are on a regular cleaning schedule, you may find that you do not need to complete each task every time you clean.

This list is also divided by room, allowing you to even focus on one room at a time, depending on your schedule. However, if your schedule is too busy then call **Clean and Shiny** today, and have your home cleaned tomorrow.
